Experience

CDK Global Summer 2017

Worked on a full stack web application team for data reporting to dealerships and helped to build out a brand new web application to expedite the enrollment of dealers to CDK services.

Technologies: AngularJS, Java, Python

Byte Fall 2015

Worked on the Byte Android application through bug fixing and feature additions alongside a small team.

Technologies: Java, Android

Projects & Activities

Web development

I have worked on multiple websites developing both the front & back end. I have used a variety of technologies like Angular, Vue, HTML, SASS, and nodejs. Check out some of my work or find the code on my github.

Natural Language Processing

During my internship at CDK Global, I participated on a team working on a NLP solution with Python for categorizing user input text for a company wide hackathon. In a week our team of 6 created a functioning product that could classify text to multiple accurate categories in sub millisecond time. We placed 1st at CDK for our project!

Kentcss

I am currently working on simple modern CSS framework based on Flexbox using SCSS. The project is available on npm as kent-css!

Design Collective -- President

I have worked with a UT org called Design Collective since its inception in 2015, after serving as both director of education and vice president. I now have the pleasure to be able to lead the organization to help cultivate and spread the design community at UT.

Skillset

JavaScript	CSS/SCSS
Python	Webpack
Java	MongoDB
C++	SQL
Nodejs	Docker
Angular	Git
Vuejs	Agile

Education

University of Texas

2014 - 2018

BSA in Computer Science

w/ certificate in Digital Arts & Media

GPA: 3.33

Relevant coursework:

Data structures
Computer architecture
Operating systems
Object oriented programming
Algorithms & Complexity
